

Version 1.35 changes

Issue 69

Suite 7 - Beam Lattice:

- Updated 2021_06 to make anisotropic scaling more obvious.

ISSUE 68

Suite 7 - Beam Lattice:

- All ball mode test cases (2018_xx to 2021_xx, plus 2506_xx) have been updated to use the new ball schema
- Positive test case 2021_09 added – use of ballref in a beamset
- Positive test case 2021_10 added - Ball not required extension

ISSUE 67

Suite 8 - Secure Content:

- Added negative test N_EPX_2605_07 – Hacked encrypted model

ISSUE 62

Suites 1 – 6:

- Moved positive test case P_???_104_03 to a negative test case N_???_208_01
- Deleted positive 104_03
- Added new positive test case P_???_104_04 – Model name and related relationship referenced using escaped Unicode characters. Include part name and part number with unescaped Unicode

Suites 2 and 6:

- New negative test case N_???_208_02 - Added a second negative test case for the texture files using unescaped Unicode in the ZIP part name, xml (relationship), and texture2d portion of model.
- Add new positive test case P_???_104_05 – Added positive test for the texture files using escaped Unicode in the ZIP part name, xml (relationship), and texture2d portion of model.

ISSUE 56

Suites 1 – 6:

- Added negative test case N_???_0204_02 - Test where the capitalization of the thumbnail extension zip part name differs from the capitalization used in the relationship Target attribute
